

Name: Mariana Emauz Valdetaro

Planet: Earth

Stardate: 78715.8

I'm an independent researcher, multidisciplinary thinker, and a poet. I see things as systems and groups of things as inter-connected systems. I care deeply about most things, and against all odds I deep dive into how systems come to be, relate and rules that govern their dynamics.

I'm an active member of the [Society for Multidisciplinary and Fundamental Research](#) and alongside with my colleagues at the Board, and our growing community of associates we promote a space for discussing fundamental questions, by connecting different fields of inquiry, and even organize a yearly Interdisciplinary School. If this tickles your curiosity learn more [here](#)

A stable version of my resume for recruiters can be found [there](#).
